March 3, 2021

Dear Pikwakanagan Community Members,

We are writing to you today to provide updated information about the roll out of COVID-19 Vaccinations for Pikwakanagan.

On March 4, 2021, a Vaccination Clinic designated for Health Care Workers will take place. The Health Care Workers are identified as the next priority as directed by the provincial government.

The AOPFN Vaccine Team is planning for its Community Vaccination Clinic that will vaccinate those 65 years of age and over. The Vaccination Clinics will be a phased approach. That means the vaccines will be administered to the community based on the number of doses received and according to the provincial priority list. Unfortunately, we still do not know the date of vaccine arrival and the number of doses that will be received. Once we know this important information, a phone call will be made to provide the dates and times of appointments.

In preparation for the Vaccination Clinic, the AOPFN Vaccine Team will:

- Contact all residents of this age group (65+) by phone.
- Complete consent form
- Register residents.
- Advise if further follow up by your Primary Care provider (physician, specialist, NP) is required; a form will be provided to get completed by the Primary Care provider
- Provide time for any questions or concerns you may have.
- Provide a follow up call to confirm appointment date and time for first vaccination.

Please be patient, there will be enough vaccines for all community members. Until then, we would like to remind all residents that the COVID-19 virus is still a threat to our community. We ask that you remain vigilant and follow all Health and Safety precautions.

***Vaccinations protects yourself, your family, seniors, and the community.***

## For Immediate Release

(Pembroke, Ontario, 9:30 a.m. February 22, 2020)

### Government Changes the School and Child Care Screening Tool

Effective immediately, guidelines for the COVID-19 School and Child Care Screening Tool have changed across the province in accordance with provincial guidelines. The Ontario Government is adopting a more rigorous and cautious approach to the provincial screening criteria. This update to the [School and Child Care Screening Tool](#) has been made in light of the emergence of COVID-19 variants.

The [COVID-19 School and Child Care Screening Tool](#) must be completed **daily** before attending school/childcare. Individuals completing the tool must follow the instructions given at the end of the assessment and arrange for COVID-19 testing as directed.

The following changes are outlined below.

**Single-Symptom Screening** - Staff, students and children with any new or worsening symptom(s) of COVID-19, **even those with only one symptom**, must stay home **without exemption**, until:

- They receive a negative COVID-19 test result;
- They receive an alternative diagnosis by a health care professional; or
- It has been 10 days since their symptoms started and they are feeling better.

**Asymptomatic household members of symptomatic individuals must: Self isolate, do not leave home, even for essential reasons.**

- All asymptomatic household contacts must also self-isolate **without exception, even for essential reasons**, until the symptomatic individual receives a negative COVID-19 test result or an alternative diagnosis by a health care professional.
- If the symptomatic individual does not seek COVID-19 testing, all household contacts must also self-isolate for 14 days from their last contact with that symptomatic individual.

**Asymptomatic household members of asymptomatic individuals who are high-risk contacts: Stay at home, except for essential reasons.**

- If an asymptomatic individual is directed to self-isolate as a high risk contact of a positive COVID-19 case, their asymptomatic household members should stay home for 14 days except for essential reasons. In this case, attending school, child care or work is allowable for the household contacts as an **essential activity**, as long as everyone in the household remains asymptomatic.

It is important that parents monitor a child's illness and keep them out of school or daycare if they are sick, as you would with any other illness such as the flu. If you or your child are sick, contact your Family Physician. If you do not have a Family Physician or cannot access your Family Physician, call Renfrew County Virtual Triage Assessment Centre (VTAC) at 1-844-727-6404 to schedule an appointment. If you feel that you or your child are seriously ill, call 911 or go to the nearest Emergency Department.

For more information, visit RCDHU's website at <https://www.rcdhu.com/novel-coronavirus-covid-19-2/> or call 613-735-8654 or 1-800-267-1097.

**A Cumulative Effects Study?** - In studying the combined effects of all of the impacts in an area on AOPFN's values (e.g., wildlife, plants, water, air quality), the research team will seek to:

Develop a report and a map showing which areas and values across our territory are most impacted, and are of greatest concern to our members;

Help guide monitoring and restoration across the territory; and

Help ensure that future development projects take into account all of the impacts that have already occurred on the territory during the environmental assessment process.

### **Engagement with AOPFN community members:**

A community-wide survey to gather input on how to focus this study will be available online March 15<sup>th</sup>. A hardcopy version or link to the online survey can be sent by request.

It's exciting to learn that Statistics Canada is hiring for the upcoming census! They are looking for First Nation citizens in the Anishinabek Nation to help get an accurate number of people living on-reserve. They are seeking individuals to work in your communities because only your community citizens know who they are.

What does hiring a First nation worker mean for the community? Well, it means that when we are planning in our community for education, like how many babies will be in Kindergarten next year or in three years, or how many students are graduating this year and will be going to post-secondary school, we can account for more adequate funding to administer programs in education, health, and housing to our growing populations.

Anishinabek have taken great care of their citizens from cradle to grave and this data is essential in providing more accurate information and eliminating guesswork in order to continue to care for our citizens with more adequate supports.
