Land Use Plan Community Meeting

May 12 from 5:00pm-8:00pm at the Makwa Centre
Dinner and a Raffle Prize Draw for Attendees!

AOPFN has developed a Draft Land Use Plan to guide how we use and manage our reserve and purchased lands for development including:

- Housing
- Community facilities
- Businesses
- Community infrastructure
- Environmental protection
- Cultural sites
- And other issues identified as being important to a community

Our draft Land Use Plan has been developed over the past two years and is seeking final input from AOPFN members to ensure it reflects our Nation's needs and objectives for how we use and manage our lands! Please attend the community meeting on May 12 to learn more about the draft Land Use Plan!

Why are we creating a Land Use Plan?

A Land Use Plan is a fundamental component to implementing our new Land Code and exercising our new jurisdiction granted to us for managing our lands and activities on them.

Once adopted, the Land Use Plan main tool used by leadership and staff to manage the use and development of Pikwakanagan lands now and in the future. Developing the draft Land Use Plan involved consulting our community including:

- ✦ Chief and Council
- ✦ On-reserve & Off-reserve members
- ✦ Elders and Youth
- ✦ Certificate of Possession Holders

The Land Use Plan must reflect our community's collective vision for how our lands are used and developed in the future. We have held several meetings over the past 2 years with members to make sure your ideas and input are part of this plan.

Adopting the final Land Use Plan will involve a community ratification vote as required by our Land Code. We anticipate the ratification vote happening over summer and will provide members with notice once a voting date is set.

For more information on this project, please contact:

Why is a Land Use Plan Important?

- It will be the foundation of how we plan and manage land use and growth in our community in the future.
- It guides how to best use our lands for the benefit of the whole community.
- It supports good decision-making about investment and maintenance of our community buildings and infrastructure.
- It establishes a fair, clear and consistent system of rules for land use in our community.
- It supports businesses and job creation, while making sure different uses of land do not conflict with each other.
- Identifies important cultural and environmental areas that should be conserved

Project Process To Date:

SARS-CoV-2 in Deer in Ontario

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry would like to provide you with information regarding the results of a recent [study](#) which found the virus that causes COVID-19 (SARS-CoV-2) in 17 white-tailed deer from southwestern Ontario. In addition, there has been a probable case of transmission of the virus from a deer to a human. The ministry is taking this opportunity to proactively communicate with Indigenous communities, licensed Ontario hunters and anyone handling wildlife to take precautions and follow health and safety recommendations when handling and processing wildlife, including:

- maintain up-to-date vaccinations for COVID-19
- process harvested wildlife outdoors or in a well-ventilated area
- wear a well-fitted mask, disposable gloves and eye protection
- avoid splashing fluids from wildlife, especially respiratory tissues
- wash hands or use hand sanitizer after handling live wildlife or carcasses and after removing gloves
- clean and sanitize equipment and surfaces between uses
- keep pets/hunting dogs away from carcasses and discarded tissues
- don't consume wildlife that appears sick or was found dead from unknown causes
- don't feed wildlife - it can spread disease
- don't work with wildlife if you think you may have COVID-19

The Ministry would like to stress that there is currently no known risk of eating venison if food safety recommendations such as those developed by the [Public Health Agency of Canada](#) are followed. Although the live virus has not been found in meat, if present, the virus would be killed at the recommended internal cooking temperature of 74°C (165°F). More information about the study, SARS-CoV-2 and animals, safe handling and consumption can be found at:

- [bioRxiv](#)
- [Animals and COVID-19 – Canada.ca](#)
- [Wildlife and SARS-CoV-2 handling guidelines](#)
- [Food safety recommendations](#)

Questions or concerns regarding public health should be directed to the [Public Health Agency of Canada](#).

Should you have any questions regarding the Ontario study results, you may contact Anne McCarthy at 1-888-574-6656 or anne.mccarthy@ontario.ca.

Peter Carter

DIABETES AND OUR FEET

As we get into warmer months, we can trade in our clunky winter boots with more suitable spring weather shoes. Make sure your feet are enjoying the shoes they're walking in.

- Go shoe shopping at the end of the day when your feet are most swollen.
- Have your shoes professional fitted if you have loss of sensation in your feet (neuropathy).
- The retailer should measure your foot both in the seated and in the standing position.
- Check the length, width, and depth of your foot while standing.
- The widest part of the shoe should be where the ball of your foot rests.
- When the shoe is on, it should feel snug but not tight.
- Make sure there is room for your toes to wiggle.
- Find a shoe that is appropriately shaped for your foot. Some shoes are made more curved while others are straighter.
- Replace your shoes and insoles regularly.
- The best shoe is the one that fits your foot comfortably.

Features of a supportive shoe...

- Fits well
- Made out of breathable material
- Has a firm heel
- Has either shoelaces or Velcro
- Has good shock absorption
- Can't be twisted or bent
