DANGER

Higher than usual water flow at the dam in Pikwakanagan

Construction has begun at the dam in Pikwakanagan. In order to complete repairs to the dam, water flow must be diverted from the side opposite Pikwakanagan resulting in water flowing at a rate much higher than the seasonal norm, on the Pikwakanagan side of the dam. Do not approach the river's edge 150 M below or above the dam at this time.
