4 ways to help reduce your risk of dementia

FOCUS ON HEALTHY FOODS

Eat healthy foods daily to help reduce high blood pressure and avoid diabetes. Both conditions may increase the risk of dementia.

Choose fruits, vegetables, whole grains, and traditional nourishing foods as often as possible.

BE ACTIVE

Exercise improves blood flow, which can help keep your brain healthy.

Walk, dance, garden, hike or bike - find your favourite activities and do them regularly.

STAY CONNECTED WITH COMMUNITY

Spending time with others may reduce the risk of developing dementia.

Share stories, enjoy meals together, and attend community gatherings.

LEARN SOMETHING NEW

Learning is good for your brain - and even better if you do it with others.

Learn something new - like a new language, a new type of exercise or a new hobby.

For more information on reducing the risk of dementia visit Gotoinfo.ca/PHAC-dementia

MOUTH CANCER

Self Check

Are you checking for Mouth Cancer once a month?

The 2 minute do it yourself self-examination that could save your life!

Examine yourself once a month using our 2 minute self check guide below! All you need is a **mirror**, a good **light source** and **clean fingers!**

01 Face
Look at the whole face - are there any swellings you haven't noticed before? Inspect your skin - has anything changed recently? Have moles become larger or started to itch or bleed. Turn your head from side to side - this stretches the skin over the muscles making lumps easier to see.

02 Neck
Run your fingers under your jaw and feel along the large muscle on either side of your neck using the pads of your fingers. Are there any lumps or bumps? Feel everything with the same on both sides!

03 Lips
Use your index finger to gently pull each lip away from the rest of your mouth. Push your index finger up underneath and down the inner side of the lip. Look for any changes in colour or texture.

04 Gums
Use your thumb and forefinger. Examine your gums feeling around the gum for anything unusual.

05 Cheeks
Open your mouth and pull your cheeks away, one side at a time, with your finger. Look for any red or white patches. Does everything feel the same on both sides? Use your finger to check your tongue for any lumps or tenderness. Repeat on the other side. Your tongue can be helpful to locate sore areas, ulcers or rough patches.

06 Tongue
Gently pull out your tongue and look at one side first and then the other. Look for any swelling, ulcers or change in colour. Examine the underside of your tongue by lifting the tip of your tongue to the roof of your mouth.

07 Floor and Roof of Mouth
Place your index finger and thumb on either side of your mouth, with your index finger pointing up. Look to see if there are changes in colour or texture. Check for changes in texture with your finger. Lift your tongue up and look underneath at the floor of your mouth. Look for any lumps or changes that are unusual. Gently press your finger along the floor of your mouth and under your tongue. Look for any lumps, swellings or ulcers.

Symptoms

- ✓ An ulcer or white or red patch anywhere in the mouth that does not heal within 3 weeks.
- ✓ A lump or swelling anywhere in the mouth, jaw or neck that persists for more than 3 weeks.
- ✓ Difficulty in swallowing, chewing or moving the jaw or tongue.
- ✓ Numbness of tongue or other area of the mouth.
- ✓ A feeling that something is caught in the throat.
- ✓ A chronic sore throat or hoarseness that persists more than 6 weeks.
- ✓ Unexplained loosening of teeth.

Risk Factors

- ✓ Tobacco use is the main cause of mouth cancer.
- ✓ Drinking alcohol to excess can increase risks four fold.
- ✓ Drinkers and smokers are 30 times more likely to develop mouth cancer.
- ✓ Poor diet and social deprivation is linked to a third of all cancer cases.
- ✓ The Human Papilloma Virus (HPV), transmitted through oral sex, could overtake tobacco and alcohol as the main risk factor within the next decade.
- ✓ Exposure to the sun is a cause of skin cancer which can affect the lips and face.

Facts About Mouth Cancer
