CHIEF & COUNCIL UPDATE

October 24th, 2025

Chief and council along with other members of Pikwakanagan's Emergency Response Control Group (ERCG) hosted a meeting this week at the Makwa Centre to update our community on the State of Emergency (SOE) in Pikwakanagan, which was declared by Chief and Council in 2023 due to the Opioid Crisis.

The Emergency Response Control Group plans and coordinates AOPFN's overall response during declared emergencies. The group is activated under the authority of, and with the participation of the Chief and Council and includes the Executive Director of Operations and key First Nation personnel.

Dozens of community members came out to the meeting, both in person and online. The purpose of the meeting was to remind community members of the circumstances that led to the declaration of the State of Emergency, to inform members of what the effect of calling the SOE had, all of the actions that have been undertaken since the declaration, what the situation is in Pikwakanagan now and what the next steps will be.

Following departmental updates and evaluation, the ERCG recommended that the State of Emergency should continue until at least March 2026 at which time the situation will be reassessed. This will also provide more time to work to ensure ongoing funding, staffing and programming are in place to support the progress that has been made over the past two years and to continue to address these challenges.

Community Update

Incident to Report at Chalk River Laboratories (CRL)

Background:

- October 2nd - AOPFN was notified by Canadian Nuclear Laboratories (CNL) regarding an incident that occurred at Chalk River Laboratories (CRL) last week, which has since been reported as fully remediated by CNL below.
 - October 2nd - CNL posted the following 'public disclosure' regarding this incident online:
- As part of planned maintenance activities at the CRL on Sept 22-24, a sewage storage tank was pumped out into a septic truck. On completion of the pump-out, the waste materials were disposed of at a sewage landfill. Though radiological checks were made in advance, during, and after the work, subsequent activities have indicated that the sewage contained radiological contamination.
- On discovery immediate action was taken to address the issue. The landfill, the vehicle and the equipment from the job have been secured and an investigation is now underway to understand the extent of condition, and activities to clean-up the site are being initiated. CNL has confirmed that all discharges from the CNL water treatment facility remain within normal parameters, and we continue to monitor closely. The Canadian Nuclear Safety Commission (CNSC) has been notified of the event as well.
- October 2nd - the AOPFN Consultation Department immediately notified Chief & Council about this incident and provided the same details within CNL's 'public disclosure' from online & above.
 - October 6th - CNL provided AOPFN with another update, as per their second 'public disclosure' online.
 - CNL completed remediation of the affected sewage landfill location. All sewage sludge and any resulting contaminated soils were safely removed and transported to CRL for storage. CNL conducted an additional comprehensive verification of the landfill area, to confirm that the removal and clean-up effort was effective.
 - Update: Recovery and remediation of off-site contamination now complete - Canadian Nuclear Laboratories

The Algonquin Foods Program – Communication Priorities:

After careful review of all the details provided to AOPFN, we have classified this incident as a Level 2, medium risk, unplanned alert to AOP membership.

- Level 1 - low risk/planned
- Level 2 - medium risk/unplanned
- Level 3 - high risk/unplanned
- Level 4 - critical risk/emergency/unplanned

AOPFN reached out to CNL to gather more information on this incident itself. Here is what was shared:

- The contamination was first discovered on Oct 1, 2025.
- The waste was extracted from a sewage lift tank, that had no other operations, only input to the tank is sewage from the sanitary drains.
- The contaminated septic truck and equipment are in a secure area at CRL.
- The contaminated waste was taken to a landfill west of Deep River, and CNL completed full remediation (clean up) of the affected sewage landfill location. All sewage sludge and any resulting contaminated soils were safely removed and transported to the CRL for storage.
- CNL conducted an additional comprehensive verification of the landfill area, to confirm that the removal and clean-up effort was effective.
- The Sewage Removal company's site operations are co-located adjacent to the landfill site. The equipment, buildings and surrounding area at this site were examined to ensure that they were free of any contaminants.
- How did the sewage in this lift tank get contaminated?
 - o The sedimentary sludge had settled in the tank and accumulated over decades, therefore it would be difficult for CNL to pinpoint a specific source of the contamination.
 - o As an immediate measure, CNL stopped all movement of sewage wastes off the CRL site and CNL took samples of the sewage sludge for detailed characterization (analysis), which will help them to identify the potential causes of this contamination.

o CNL is also conducting a rigorous investigation into the root cause of this event, in order for them to fully understand how it occurred and to strengthen their work practices to prevent recurrence.

AOPFN also requested answers to questions that have been developed through our Algonquin Foods Program:

1. How may this affect AOPFN members? Fish? Wildlife? Plants? Air?

- CNL does not anticipate any lasting impact on the environment. Ongoing and increased monitoring do not indicate any other offsite release to the environment as a result of this event.
- The landfill has been thoroughly examined to ensure that all resulting radiological hazards have been addressed. Comprehensive detailed scanning of the contaminated area, and the surrounding field were conducted to ensure completeness of the remediation.

2. What are the emergency plans in place?

- On discovery, CNL immediately dispatched its Radiological Assessment Team to secure the site, evaluate the extent of contamination, and protect the sewage sludge until the remediation was completed.
- Within hours of discovery, CNL began the retrieval and remediation efforts. The sewage sludge and any contaminated soil were removed from the landfill and returned to Chalk River, and then safely stored.
- Additional follow up monitoring has confirmed that the area is free of contamination.

3. Route, destination, mode of transport, date(s) and time(s)?

- The sewage sludge was removed from the Chalk River site inside a standard septic vacuum truck and deposited at a sewage landfill on the west side of Deep River.
- The sewage sludge was moved in three trips between Sept 22 and Sept 24.
- The sewage sludge and any contaminated soils were returned to CRL in secure, purpose-built packages, transported by truck from Oct 3-5.

4. Level of waste being transported (low, intermediate, high)?

- The waste is sewage sludge from the Sanitary Sewage system at the CRL, which was determined to be Low Level Waste (LLW). CNL completed numerous samples of the material to ensure that they had a comprehensive and accurate understanding of the radiological risks.
- The Sanitary Sewage system collects waste and wastewater from toilets, washroom and break room sinks, floor drains for example.
- Given the history of the site and the sanitary sewage system, it is known to have collected some level of radioactive contamination, although in this particular project, it was not identified during the testing that was completed in advance of the job.
- The liquid on top of the sludge was sampled, determined as clean, and was dealt with by CNL through their routine sewage treatment process.
- The sludge at the bottom of the tank had accumulated over several decades of use. This sludge was also sampled and confirmed to be free of radioactive contaminants before being removed using a vacuum truck for septic clean out.
- As the sludge was fairly dry, a small amount of water was introduced to allow the sludge to be pumped out.

At this point, the contamination has been fully remediated (cleaned up), and CNL will continue to investigate the root cause of this event and monitor it closely. CNL will provide AOPFN with the investigation results upon completion and also provide ongoing updates as well. The Consultation Communications Specialist will also provide ongoing updates to the AOPFN membership as they become available.

**The Algonquin Foods Program
Omà̀m̀wininì Mìd̀jiman Ijichigewin**

The Algonquin Foods Program (AFP) began in 2023 and is the outcome of concerns raised by AOPFN members about the effects of the nuclear industry on the health of the environment and our people, on our unceded and un-surrendered traditional Algonquin territory. The AFP is designed to be a long-term program that is an AOPFN-controlled process of communication and confidence building that will provide our people with reliable, accurate, and trusted information.

Please note that we will be releasing a Quarterly Update for the Algonquin Foods Program soon, which will provide additional info on the program, and updates on the nuclear projects that are currently being worked on by the team within the AOPFN Consultation Department. Stay tuned....

Meegwetch

The Algonquins of Pikwakanagan First Nation Traditional Pow-Wow Committee sends a heartfelt “Meegwetch” to our elders, Veterans, and Flag Carrier, our MCs Kevin and Fred, our Arena Director Greg, our Head dancers Keysha and Awema, and Jr’s Biidaazhe and Cash, and to all the dancers and drummers, for the overwhelming success of our 36th Traditional Pow-Wow. Thank you to the membership for attending this year’s pow-wow.

This year’s pow-wow had over 200 registered dancers and 6 drum groups. We also had 35 craft vendors, 8 food vendors, and over 2,000 attendees.

Meegwetch to Tasheena Sarazin and the jingle dress dancers for the beautiful healing ceremony, and meegwetch to Sonny Robbins for the healing special on sobriety.

A special thanks to Pikwakanagan Excavating and Landscaping, Clem Sarazin, and Brody Verch, for the groundskeeping, as well as Keysha Two-Axe McMullin and the Earthwalker students. Janet Kohoko and the Neyagada Wabandangaki monitors, who assisted in the caretaking and prep of the grounds. Thank you to the five AECOM employees who volunteered and helped all weekend. Your assistance was invaluable. Thank you, St. Johnson Ambulance, for providing medical assistance throughout the weekend. Thank you to Michelle and Sam Whiteduck for providing the delicious feast. Throughout the weekend, we received amazing support from our Fire Keepers, Security, and numerous volunteers who generously donated their time and effort to make this event special. Thank you on behalf of the Traditional Pow-Wow Committee.

Thanks to this year's Sponsors for their generous donations, which made this event possible. Each year, members of the Traditional Pow-Wow committee seek out partnerships, organizations, and companies looking for donations. Donations are accepted in various forms, including financial contributions, sponsorships, donations of picnic tables, materials, supplies, and gifts. Meegwetch, to the following

Protect Yourself and Your Community Get Your Flu Shot!

- The flu shot is your best defense against influenza.
- Recommended for everyone 6 months and older.
- It's safe and free for community members.
- Helps protect you, your family, Elders, and community.
- You cannot get the flu from the flu shot.

Other Ways to Protect Yourself This Flu Season

- Wash your hands often or use hand sanitizer.
- Cover your coughs and sneezes with your arm or tissue.
- Stay home when sick to prevent spreading illness.
- Keep surfaces clean and disinfect high touch areas.
- Take care of your health; eat well, stay active, and get enough rest.

YOUR INPUT IS VALUED WE WANT TO HEAR FROM YOU

THE REMARKABLE COMMUNICATIONS TEAM WILL BE ON-SITE IN PIKWAKANAGAN THE WEEK OF OCTOBER 27, 2025, COMPLETING COMMUNITY SURVEYS, AS WELL AS 1:1 & GROUP SESSIONS, IN RELATION TO NIGIG GAMIK, PIKWAKANAGAN'S CHILDREN'S WELL-BEING AGENCY, TO GATHER INPUT FROM THE COMMUNITY AND MEMBERSHIP OF PIKWAKANAGAN.

THE TEAM WOULD BE HONOURED TO MEET WITH YOU. FOOD AND REFRESHMENTS WILL BE PROVIDED. PLEASE SEE AVAILABLE DROP IN SESSIONS BELOW:

- MONDAY, OCT. 27TH, 28TH, 29TH, 2025 AT THE BINGO HALL (469 KOKOMIS INAMO) DROP INS WELCOME FROM 11:30AM-6PM
- OCTOBER 30TH, 2025 AT THE HAUNTED MAKWAKWA EVENT (83 KAGAGIMIN INAMO) FROM 5-8PM
- SURVEYS MAY ALSO BE COMPLETED VIA THE QR CODE WITHIN THIS POSTING
- YOU CAN ALSO TEXT 1-250-999-1745 OR EMAIL NGIG@REMARKABLECOMMUNICATIONS.COM FOR MORE INFORMATION OR TO BOOK AN APPT.

Cancer screening is about helping you live a good life

Cancer screening is testing done on people who have no symptoms and generally feel fine, but are at risk of getting cancer. Regular screening is important because it can find some cancers or pre-cancers early when treatment has a better chance of working.

Four organized cancer screening programs are offered to eligible people in Ontario.

BREAST Mammogram

Women* 40 to 74 years old who are eligible

If you think you may be high risk for breast cancer and are 30 to 69 years old, talk to your health care provider.

Every 2 years for most

*Breast cancer screening is recommended for women, Two-Spirit people, trans people and nonbinary people ages 40 to 74 who are eligible for screening through the Ontario Breast Screening Program (OBSP).

COLON Fecal Immunochemical Test (FIT)

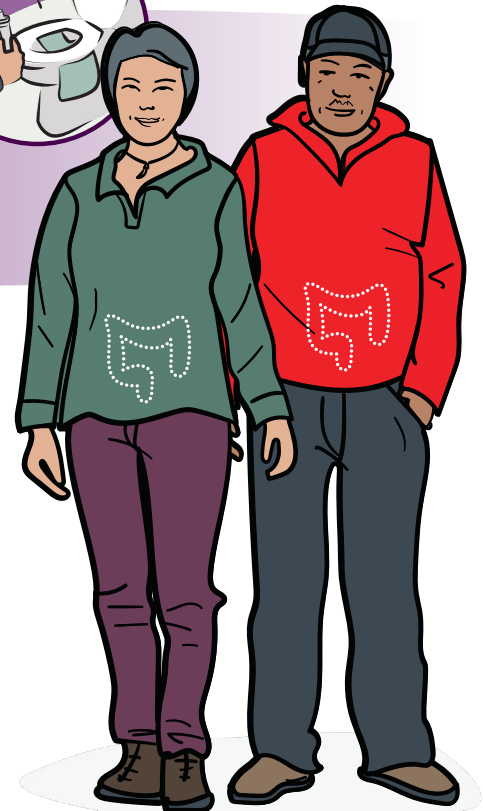

People 50 to 74 years old who are eligible

If you have a parent, sibling or child who was diagnosed with colon cancer, please contact your health care provider to see if you should be screened with a different test.

Every 2 years for most

Test can be done at home.

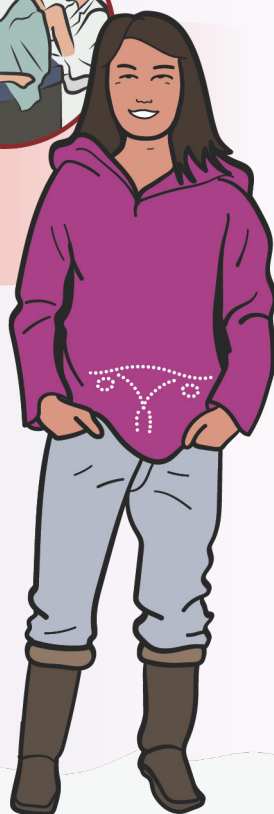

CERVICAL Cervical Screening Test

Women* 25 to 70 years old who are eligible

Every 5 years for most

*Cervical screening is recommended for eligible women, Two-Spirit people, transmasculine people and nonbinary people with a cervix.

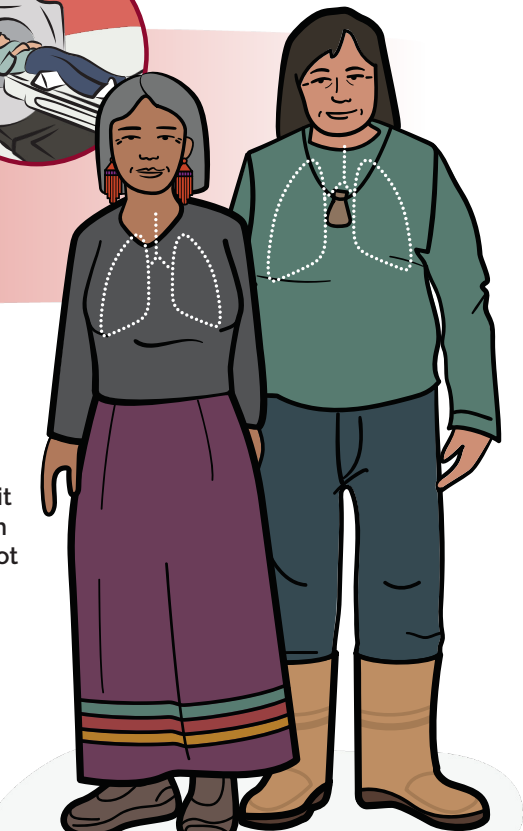

LUNG Low-Dose Computed Tomography (LDCT)

People 55 to 80 years old who are eligible

If you are age 55 to 80 and have smoked cigarettes every day for at least 20 years — it does not have to be 20 years in a row, which means there could be times when you did not smoke — talk to your health care provider about being referred to an Ontario Lung Screening Program (OLSP) location, or contact an OLSP location directly.

Every year for most

The screening tests are free for eligible people in Ontario. Make sure your Ontario Health Insurance Plan (OHIP) card is up to date. You might get a letter from Ontario Health (Cancer Care Ontario) asking you to get screened for cancer. These letters are part of Ontario's cancer screening programs.

Please contact your health care provider to learn more about your screening options. If you do not have a health care provider visit: iphcc.ca

For more information about cancer screening, visit: cancercareontario.ca/getchecked

Pikwakanagan Drug Tip Line

OPP Community Street Crime Unity in Renfrew County have established a drug tip line for Pikwakanagan First Nation. The number is:
613-689-0805

The tip line will be monitored by Detectives within the Community Street Crime Unit (CSCU). Messages will be checked regularly. If the caller wishes to be called back, an investigator will return the call.

This line is only intended for drug-related information

Any emergency requests for police assistance or other call for service should go through normal channels.

Renfrew County Crime Stoppers is still available for drug and non-drug related tips.

- Pikwakanagan Drug Tip Line: 613-639-0805
 - Renfrew County Crimestoppers: 1-800-222-8477
 - Any Emergency call: 911
 - OPP non-emergency line: 1-888-310-1122

Early Childhood Educator

Department: Mindiwin Manido Day Care

Supervisor: Daycare Supervisor

\$49,628/ annually - 40 hours a week - Full -Time Permanent Deadline

to Apply: Posting will continue until roles are filled.

The Early Childhood Educator is responsible for the overall daily supervision, monitoring, care and nurturing of children enrolled in the Mindiwin Manido Day Care programs; The Early Childhood Educator is responsible for the delivering of a children's educational and developmental program that encompasses a wholistic and interdisciplinary team approach. The Early Childhood Educator will interact and communicate with parents/guardians for the overall benefit for the child and/or children.

- Assists children with nutritional and personal care needs including but not limited to toilet, diapering
- Procedures, personal hygiene and medical.
- Interacts with children and builds positive relationships.
- Ensures an inclusive environment for all children.
- Assists with the development, implementation, evaluation and modification of a children's educational and cultural program.
- Provide activities and opportunities i.e. learning through play that encourage curiosity, exploration, and problem-solving appropriate to the development levels of the children.
- Creates an environment conducive to the learning of Algonquin culture and language development and appropriate to the physical, social, intellectual, and emotional development of the children.
- Observes, guides and facilitates the development and positive behaviour of children.
- Use and promote active listening skills.
- Assist with the development, implementation, evaluation and modification of individual educational and developmental plans (IEDP);
- Maintains daily journals and/or portfolios of each Childs' progress, including samples of their artwork, writing, etc

For full Job Description please email hrassistant@pikwakanagan.ca

REQUIREMENETS:

- Successful completion of Post Secondary Education diploma in Early Childhood Education
- 1-year experience working in a licensed child care group setting as an Early Childhood Educator.
- Registered and in "good standing" with the College of Childhood Educators of Ontario (CECE)

CONDITIONS OF EMPLOYMENT:

- An acceptable Criminal Records Check and Vulnerable Sector Check; annually.
- Certificate of medical health by a physician and complete record of immunization; annually.
- Current First Aid and CPR "Level C" AED certification; annually
- In professional 'Good Standing' with the College of Early Childhood Educators, on an ongoing basis.
- Maintain 'Registration' with the College of Early Childhood Educators on an annual basis.

How to Apply

- Cover Letter
- Current Resume
- Three (3) professional/work-related references that include name, phone number and email address.

Submit to:

Human Resources Department
Algonquins of Pikwakanagan First Nation
1657A Mishomis Inamo, Pikwakanagan, Ontario, K0J 1X0

hr@pikwakanagan.ca
